

LINE EXTENSIONS - MINIMUM CONTRACTS & MINIMUM REVENUE

Line extensions are made on a basis of minimum revenue per 100 feet per month. The minimum bill contracts normally shall be for a term of three (3) years but circumstances may justify longer contractual terms.

- a. The minimum revenue required for extending a two inch (2") main line in excess of 200 feet shall be \$518.00 per 100 feet, but subject to change whenever JCCUD's cost of service studies indicate a change is necessary. Minimum revenue equal to the meter service charge shall be required by all services less than 100 feet.
- b. The minimum revenue required for extending a three-fourths inch (3/4") service line in excess of 100 feet shall be \$491.00 per 100 feet, but subject to change whenever JCCUD's cost of service studies indicate a change is necessary.
- c. Minimum monthly contracts applicable to customers applying for connections to line extensions under existing minimum contracts shall be established by the Utility District, giving consideration to the following conditions:
 1. Effective minimums of present contracts.
 2. Possible reductions in minimums now in effect.
 3. Length of time the extension has been in service.
- d. At such time as additional customers may be added to an existing line extension serving minimum contract customers, the presently served customers having not less than six (6) months contractual obligations remaining shall receive corresponding adjustments in their minimum bill during the remaining life of the contracts.
- e. A cash deposit or an irrevocable letter of credit will be required in addition to minimum contract being signed under the following conditions:
 1. Line extensions that require a capital outlay of \$1,500.00 or more.
 2. Line extensions requested by a non-property owner.
 4. Line extensions requested by land developers or a contractor building houses to sell.

The amount of the deposit will be the cost of the extension and will be adjusted annually.

STANDARD REVISED OPERATIONAL POLICY NO. JCCUD-91-5.

EFFECTIVE DATE February 27, 1992 APPROVAL DATE February 27, 1992.
